

# **BRAND PERFORMANCE CHECK**

# **ROOTS for Safety B.V.**

PUBLICATION DATE: APRIL 2019

this report covers the evaluation period 01-01-2018 to 31-12-2018

#### ABOUT THE BRAND PERFORMANCE CHECK

Fair Wear Foundation believes that improving conditions for apparel product location workers requires change at many levels. Traditional efforts to improve conditions focus primarily on the product location. FWF, however, believes that the management decisions of clothing brands have an enormous influence for good or ill on product location conditions.

FWF's Brand Performance Check is a tool to evaluate and report on the activities of FWF's member companies. The Checks examine how member company management systems support FWF's Code of Labour Practices. They evaluate the parts of member company supply chains where clothing is assembled. This is the most labour intensive part of garment supply chains, and where brands can have the most influence over working conditions.

In most apparel supply chains, clothing brands do not own product locations, and most product locations work for many different brands. This means that in most cases FWF member companies have influence, but not direct control, over working conditions. As a result, the Brand Performance Checks focus primarily on verifying the efforts of member companies. Outcomes at the product location level are assessed via audits and complaint reports, however the complexity of the supply chains means that even the best efforts of FWF member companies cannot guarantee results.

Even if outcomes at the product location level cannot be guaranteed, the importance of good management practices by member companies cannot be understated. Even one concerned customer at a product location can have significant positive impacts on a range of issues like health and safety conditions or freedom of association. And if one customer at a product location can demonstrate that improvements are possible, other customers no longer have an excuse not to act. The development and sharing of these types of best practices has long been a core part of FWF's work.

The Brand Performance Check system is designed to accommodate the range of structures and strengths that different companies have, and reflects the different ways that brands can support better working conditions.

This report is based on interviews with member company employees who play important roles in the management of supply chains, and a variety of documentation sources, financial records, supplier data. The findings from the Brand Performance Check are summarized and published at <u>www.fairwear.org</u>. The online <u>Brand Performance Check Guide</u> provides more information about the indicators.

#### BRAND PERFORMANCE CHECK OVERVIEW

#### ROOTS for Safety B.V. Evaluation Period: 01-01-2018 to 31-12-2018

| MEMBER COMPANY INFORMATION   |                        |
|--|------------------------|
| Headquarters:  | Hoogvliet, Netherlands |
| Member since:  | 01-07-2013             |
| Product types:   | Workwear               |
| Production in countries where FWF is active:   | China                  |
| Production in other countries:   | Germany, Italy, Poland |
| BASIC REQUIREMENTS   |                        |
| Workplan and projected production location data for upcoming year have been submitted? | Yes                    |
| Actual production location data for evaluation period was submitted?                   | Yes                    |
| Membership fee has been paid?  | Yes                    |
| SCORING OVERVIEW   |                        |
| % of own production under monitoring   | 99%                    |

| Category   | Good                   |

3/38

#### Summary:

ROOTS for Safety has shown progress and met most of FWF's performance requirements. ROOTS for Safety surpasses FWF's monitoring threshold for members after three years of membership by monitoring 99% of production. With a bench marking score of 57, ROOTS for Safety has been awarded the category 'Good'.

In 2018, ROOTS for Safety expanded product range to protective wear for industries beyond the oil and gas industry. ROOTS for Safety increased the monitoring of their suppliers' compliance to their social, environmental and technical requirements, in order to increase certifications and safety standards to inform end user of their new product range. ROOTS for Safety also signed an agreement with their main supplier in China, to store stock within the factory. With a constant stock at their main supplier, ROOTS for Safety, has managed to increase the accuracy of their forecasting system for their planning. Production can now be done throughout the year as orders do not dictate the time pressure for suppliers. Deadlines are more flexible, and therefore production can easily be shifted into the low season. This is predominantly decided by the supplier so long as the agreed number of products remains always in stock. Whilst a verification audit has not yet concluded the impact this will have to the factories planning, ROOTS for Safety believes that this new system should reduce the overtime burden.

ROOTS for Safety can still make improvements in addressing wages with their main supplier. ROOTS for Safety needs to analyse the between its buying prices and wage levels in production locations. Using the tools provided by FWF such as the Wage ladder and costing sheets, ROOTS for Safety can begin to document, monitor, negotiate and evaluate the improvements at its suppliers as well as the costing sheets per country.

#### PERFORMANCE CATEGORY OVERVIEW

Leader: This category is for member companies who are doing exceptionally well, and are operating at an advanced level. Leaders show best practices in complex areas such as living wages and freedom of association.

Good: It is FWF's belief that member companies who are making a serious effort to implement the Code of Labour Practices—the vast majority of FWF member companies—are 'doing good' and deserve to be recognized as such. They are also doing more than the average clothing company, and have allowed their internal processes to be examined and publicly reported on by an independent NGO. The majority of member companies will receive a 'Good' rating.

Needs Improvement: Member companies are most likely to find themselves in this category when major unexpected problems have arisen, or if they are unable or unwilling to seriously work towards CoLP implementation. Member companies may be in this category for one year only after which they should either move up to Good, or will be moved to suspended.

Suspended: Member companies who either fail to meet one of the Basic Requirements, have had major internal changes which means membership must be put on hold for a maximum of one year, or have been in Needs Improvement for more than one year. Member companies may remain in this category for one year maximum, after which termination proceedings will come into force.

Categories are calculated based on a combination of benchmarking score and the percentage of own production under monitoring. The specific requirements for each category are outlined in the Brand Performance Check Guide.

#### **1. PURCHASING PRACTICES**

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION  | SCORE | MAX | MIN |
|---|--------|--|--|-------|-----|-----|
| 1.1a Percentage of production volume from<br>production locations where member company<br>buys at least 10% of production capacity. | 89%    | Member companies with less than 10% of a<br>production location's production capacity<br>generally have limited influence on<br>production location managers to make<br>changes. | Supplier information<br>provided by member<br>company. | 4     | 4   | 0   |

**Comment:** ROOTS for Safety works with one main supplier in China which accounts for 89% of its total production capacity. The remainder of the production is split across two subcontractors who do the binding and embroidery for a small selection of garments and three low-risk suppliers that produce more high-level technical products.

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION   | SCORE | MAX | MIN |
|---|--------|--|---|-------|-----|-----|
| 1.1b Percentage of production volume from<br>production locations where member company<br>buys less than 2% of its total FOB. | 3%     | FWF provides incentives to clothing brands to<br>consolidate their supplier base, especially at<br>the tail end, as much as possible, and<br>rewards those members who have a small tail<br>end. Shortening the tail end reduces social<br>compliance risks and enhances the impact of<br>efficient use of capital and remediation<br>efforts. | Production location<br>information as<br>provided to FWF. | 3     | 4   | 0   |

**Comment:** In 2018, 3% of ROOTS for Safety's production volume came from production locations where member company buys less than 2% of its total FOB.

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION  | SCORE | MAX | MIN |
|--|--------|--|--|-------|-----|-----|
| 1.2 Percentage of production volume from production locations where a business relationship has existed for at least five years. | 91%    | Stable business relationships support most<br>aspects of the Code of Labour Practices, and<br>give production locations a reason to invest in<br>improving working conditions. | Supplier information<br>provided by member<br>company. | 4     | 4   | 0   |

**Comment:** In 2018, 91% of ROOTS for Safety's production volume came from production locations where a business relationship has existed for at least five years. ROOTS for Safety strongly believes in the importance of maintaining long term relationships with suppliers in order to assure better collaboration and improve consistency in production quality.

| PERFORMANCE INDICATORS   | RESULT   | RELEVANCE OF INDICATOR  | DOCUMENTATION                | SCORE | MAX | MIN |
|--|--|---|------------------------------|-------|-----|-----|
| 1.3 All (new) production locations are required<br>to sign and return the questionnaire with the<br>Code of Labour Practices before first bulk<br>orders are placed. | 2nd years +<br>member and<br>no new<br>production<br>locations<br>selected | The CoLP is the foundation of all work<br>between production locations and brands,<br>and the first step in developing a<br>commitment to improvements. | Signed CoLPs are on<br>file. | N/A   | 2   | 0   |

**Comment**: ROOTS for Safety did not have any new production locations in 2018, however showed document proof that all other existing production locations signed and returned the questionnaire with the Code of Labor Practices before first bulk orders were placed.

| PERFORMANCE INDICATORS  | RESULT       | RELEVANCE OF INDICATOR  | DOCUMENTATION   | SCORE | MAX | MIN |
|---|--------------|---|---|-------|-----|-----|
| 1.4 Member company conducts human rights<br>due diligence at all (new) production<br>locations before placing orders. | Intermediate | Due diligence helps to identify, prevent and<br>mitigate potential human rights problems at<br>suppliers. | Documentation may<br>include pre-audits,<br>existing audits, other<br>types of risk<br>assessments. | 2     | 4   | 0   |

**Comment:** ROOTS for Safety uses the help of consultants to source new locations. As part of their new check list for selecting new production locations, all potential locations must be visited first. During this visit, some basic information is gathered including other customers producing at the suppliers, and if there are any existing audits. The current working conditions are assessed uses the FWF health and safety checklist. The final decision to source at new suppliers is made after this prior evaluation by the management team, including CSR person. ROOTS for Safety's CSR person arranges quarterly reminders to follow up on existing suppliers, including discussions of on going remediation processes.

**Recommendation**: FWF recommends ROOTS for Safety to further integrate the assessment of labour standards at potential new suppliers into their decision-making in a systematic way. This can include adding tools such as the FWF Country studies conducted in order to relate country issues to selection of new supplier.

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION   | SCORE | MAX | MIN |
|---|--------|---|---|-------|-----|-----|
| 1.5 Production location compliance with Code<br>of Labour Practices is evaluated in a<br>systematic manner. | No     | A systemic approach is required to integrate<br>social compliance into normal business<br>processes, and supports good<br>decisionmaking. | Documentation of<br>systemic approach:<br>rating systems,<br>checklists, databases,<br>etc. | 0     | 2   | 0   |

**Comment:** The majority of ROOTS for Safety garments are produces at their main supplier in China. Because of the technical nature of their products, ROOTS for Safety has a production manager based in China who is responsible for assessing compliance with production quality. Their production manager works together with the CSR and QHSE manager, based at the headquarters who is responsible for the remainder of the suppliers.

Each factory is individually evaluated based on total orders, partial delivery, delays, prices monitored, quality management system, quality of product and invoicing. Additionally, compliance with Code of Labour Practices is evaluated as part of the factory social and environmental standards assessment per supplier. ROOTS for Safety checks yearly on posted CoLP in factories, and uses quarterly compliance checks to discuss CAPs as well as any ongoing quality issues at the factories. This evaluation is being done at individual supplier basis, and information is stored separately in either meeting minutes, or spreadsheets. The evaluation of compliance with Code of Labour Practices however is not completed in a systematic way, and sometimes ad-hoc based on ongoing issues at factory. ROOTS for Safety does not yet have a systematic overview of compliance of its supplier, which is documented over time. The evaluation outcomes do not formally influence ROOTS for Safety's production decisions yet.

**Recommendation**: FWF encourages ROOTS for Safety to develop an evaluation/grading system for suppliers where compliance with labour standards is a criterion for future order placement. Part of the system can be to create an incentive for rewarding suppliers for realised improvements in working conditions. Such a system can show whether and what information is missing per supplier and can include outcomes of audits, trainings and/or complaints. Similarly, developing a comparison of suppliers outcomes can help track progress at each supplier, and help identify which production location is best to reward.

| PERFORMANCE INDICATORS   | RESULT                          | RELEVANCE OF INDICATOR   | DOCUMENTATION                                   | SCORE | MAX | MIN |
|--|---------------------------------|--|---|-------|-----|-----|
| 1.6 The member company's production<br>planning systems support reasonable working<br>hours. | General or<br>ad-hoc<br>system. | Member company production planning<br>systems can have a significant impact on the<br>levels of excessive overtime at production<br>locations. | Documentation of<br>robust planning<br>systems. | 2     | 4   | 0   |

**Comment:** In 2018, ROOTS for Safety evaluated their product range which resulted in ending some lines, in order to streamline their own forecasting. Furthermore, ROOTS for Safety made an agreement with their main Chinese supplier to store stock at the factory. ROOTS for Safety now has a constant stock of high-in-demand ready made products in stock at the factory. The production manager and logistics manager work closely together with their forecasting system to assess exact demand for their products.

ROOTS for Safety is able to work with flexible deadlines based on customer orders because of their business nature. With the new insight and better overview of available products in stock, ROOTS for Safety feels like they have reduced production pressure on suppliers because they can manage to be more flexible with planning and with lead times for suppliers.

**Recommendation:** FWF advises ROOTS for Safety to reach out to other clients at the supplier to try resolve this issue. Furthermore, ROOTS for Safety can integrate an overview of factory capacities into their planning system to be able to better forecast peak production times. A good production planning system needs to be established based on the production capacity of the factory for regular working hours and information on working minutes per style.

| PERFORMANCE INDICATORS   | RESULT                  | RELEVANCE OF INDICATOR   | DOCUMENTATION   | SCORE | MAX | MIN |
|--|-------------------------|--|---|-------|-----|-----|
| 1.7 Degree to which member company<br>mitigates root causes of excessive overtime. | Intermediate<br>efforts | Some production delays are outside of the<br>control of member companies; however there<br>are a number of steps that can be taken to<br>address production delays without resorting<br>to excessive overtime. | Evidence of how<br>member responds to<br>excessive overtime<br>and strategies that<br>help reduce the risk<br>of excessive overtime,<br>such as: root cause<br>analysis, reports,<br>correspondence with<br>factories, etc. | 3     | 6   | 0   |

**Comment:** Excessive overtime was found in the audit conducted by FWF in November 2018, ROOTS for Safety only received the report in January 2019 therefore has not yet managed to fully follow up on progress of individual findings.

ROOTS for Safety had an initial discussion with factory management over the audit findings and new CAP. In prior audit findings, ROOTS for Safety has had discussion with its supplier on how to reduce overtime. The company believes with the help of the in-house stock and better planning overview set up in 2018, there should be a decrease in overtime. ROOTS for Safety is now more flexible with their production plan, which gives the factory more freedom to decide when orders should be placed, and production can be shifted to low season to avoid production pressure. ROOTS for Safety feels like they are not the main cause of overtime at their supplier but rather it is caused by other customers who place orders late and have last minute changes to their orders.

**Recommendation**: FWF recommends ROOTS for Safety to conduct further analysis at suppliers on overtime across the 12 months of the year to find a link between their dates for orders and occurrence of excessive overtime. Besides discussing it with the supplier and assessing root causes, FWF strongly recommends ROOTS for Safety to actively take measures when excessive overtime is found. Taking measures to ensure that the brand knows and shows whether excessive overtime takes place at a supplier is key in resolving the issue. Measures such as regular checks by the local technician, documents checking and interviewing workers help assess whether excessive overtime takes place.

| PERFORMANCE INDICATORS   | RESULT       | RELEVANCE OF INDICATOR  | DOCUMENTATION   | SCORE | MAX | MIN |
|--|--------------|---|---|-------|-----|-----|
| 1.8 Member company can demonstrate the<br>link between its buying prices and wage<br>levels in production locations. | Insufficient | Understanding the labour component of<br>buying prices is an essential first step for<br>member companies towards ensuring the<br>payment of minimum wages – and towards<br>the implementation of living wages. | Interviews with<br>production staff,<br>documents related to<br>member's pricing<br>policy and system,<br>buying contracts. | 0     | 4   | 0   |

**Comment:** ROOTS for Safety gets a purchasing price however is not aware of the cost breakdown per main garment. Based on own internal knowledge and experience, ROOTS for Safety can calculate estimates for these costs however these are not verified with suppliers. For their more technical products produced in Europe, ROOTS for Safety is aware of labour minutes and price breakdown as well as costs for material and finishing costs. However this is for a very small rage of high standards products that need to meet the European safety certifications. ROOTS for Safety has not yet made further analysis based on this knowledge and has not formally stored this information.

**Requirement:** ROOTS for Safety needs to demonstrate an understanding of the link between buying prices and wage levels, to ensure their pricing allows for the payment of the legal minimum wage.

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION   | SCORE | MAX | MIN |
|--|--------|---|---|-------|-----|-----|
| 1.9 Member company actively responds if<br>production locations fail to pay legal<br>minimum wages and/or fail to provide wage<br>data to verify minimum wage is paid. | Yes    | If a supplier fails to pay minimum wage or<br>minimum wage payments cannot be verified,<br>FWF member companies are expected to hold<br>management of the supplier accountable for<br>respecting local labour law. Payment below<br>minimum wage must be remediated urgently. | Complaint reports,<br>CAPs, additional<br>emails, FWF Audit<br>Reports or additional<br>monitoring visits by a<br>FWF auditor, or other<br>documents that show<br>minimum wage issue<br>is reported/resolved. | 0     | 0   | -2  |

**Comment:** in 2018, there was an increase in the local minimum wage in which the audit at the factory revealed a delayed increase in wages. Production manager based in China was able to get hold of more information on wages for 2018, where the factory provided some worker's payslips from the start of the new year as evidence of increased wages that were above the legal minimum wage and the issue resolved.

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION  | SCORE | MAX | MIN |
|--|--------|--|--|-------|-----|-----|
| 1.10 Evidence of late payments to suppliers by member company. | No     | Late payments to suppliers can have a<br>negative impact on production locations and<br>their ability to pay workers on time. Most<br>garment workers have minimal savings, and<br>even a brief delay in payments can cause<br>serious problems. | Based on a complaint<br>or audit report; review<br>of production location<br>and member<br>company financial<br>documents. | 0     | 0   | -1  |

| PERFORMANCE INDICATORS  | RESULT       | RELEVANCE OF INDICATOR   | DOCUMENTATION  | SCORE | MAX | MIN |
|---|--------------|--|--|-------|-----|-----|
| 1.11 Degree to which member company<br>assesses and responds to root causes for<br>wages that are lower than living wages in<br>production locations. | Insufficient | Assessing the root causes for wages lower<br>than living wages will determine what<br>strategies/interventions are needed for<br>increasing wages, which will result in a<br>systemic approach | Evidence of how<br>payment below living<br>wage was addressed,<br>such as: Internal<br>policy and strategy<br>documents, reports,<br>correspondence with<br>factories, etc | 0     | 6   | 0   |

**Comment:** In 2018, ROOTS for Safety did not prioritise the assessment of root causes for wages that are lower than living wages. Wages has been a discussion with their main supplier in China however the member feels like the supplier is paying higher wages relative to surrounding factories. This is based on long term relationship with supplier and information collected based on working in China for a while. This comparison however is yet to be confirmed and living wages not established. Furthermore, living wages has not been discussed with other suppliers yet.

**Requirement:** ROOTS for Safety must assess the root causes of wages that are lower than living wages, taking into account it's leverage and effect of its own pricing policy. ROOTS for Safety is expected to take an active role in discussing living wages with its suppliers. The FWF wage ladder can be used as a tool to implement living wages, to document, monitor, negotiate and evaluate the improvements at its suppliers as well as the costing sheets per country.

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION  | SCORE | MAX | MIN |
|--|--------|--|--|-------|-----|-----|
| 1.12 Percentage of production volume from<br>factories owned by the member company<br>(bonus indicator). | None   | Owning a supplier increases the<br>accountability and reduces the risk of<br>unexpected CoLP violations. Given these<br>advantages, this is a bonus indicator. Extra<br>points are possible, but the indicator will not<br>negatively affect an member company's<br>score. | Supplier information<br>provided by member<br>company. | N/A   | 2   | 0   |

| PERFORMANCE INDICATORS                                     | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION   | SCORE | MAX | MIN |
|--|--------|---|---|-------|-----|-----|
| 1.13 Member company determines and finances wage increases | None   | Assessing the root causes for wages lower<br>than living wages will determine what<br>strategies/interventions are needed for<br>increasing wages, which will result in a<br>systemic approach. | Evidence of how<br>payment below living<br>wage was addressed,<br>such as: internal<br>policy and strategy<br>documents, reports,<br>correspondence with<br>factories, etc. | 0     | 4   | 0   |

Comment: ROOTS for Safety did not determine wage increase at suppliers yet.

**Requirement:** ROOTS for Safety should analyse what is needed to increase wages and develop a strategy to finance the costs of wage increases. To support analysing the wage gap, FWF has developed a calculation model that estimates the effect on FOB and retail prices under different pricing models.

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION  | SCORE | MAX | MIN |
|---|--------|--|--|-------|-----|-----|
| 1.14 Percentage of production volume where<br>the member company pays its share of the<br>target wage | 0%     | FWF member companies are challenged to<br>adopt approaches that absorb the extra costs<br>of increasing wages. | Member company's<br>own documentation,<br>evidence of target<br>wage<br>implementation, such<br>as wage reports,<br>factory<br>documentation,<br>communication with<br>factories, etc. | 0     | 3   | 0   |

Comment: ROOTS for Safety has not set a target wage for their suppliers.

Requirement: ROOTS for Safety is expected to begin setting a target wage for its production locations.

# PURCHASING PRACTICES

Possible Points: 45 Earned Points: 18

# 2. MONITORING AND REMEDIATION

| BASIC MEASUREMENTS  | RESULT | COMMENTS  |
|---|--------|---|
| % of own production under standard monitoring (excluding low-risk countries)              | 89%    |   |
| % of production volume where monitoring requirements for low-risk countries are fulfilled | 10%    | To be counted towards the monitoring threshold,<br>FWF low-risk policy should be implemented. See<br>indicator 2.9. (N/A = no production in low risk<br>countries.) |
| Meets monitoring requirements for tail-end production locations.                          | Yes    |   |
| Requirement(s) for next performance check   |        |   |
| Total of own production under monitoring  | 99%    | Measured as percentage of production volume<br>(Minimums: 1 year: 40%; 2 years 60%; 3 years+: 80-<br>100%)  |

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION   | SCORE | MAX | MIN |
|--|--------|--|---|-------|-----|-----|
| 2.1 Specific staff person is designated to follow up on problems identified by monitoring system | Yes    | Followup is a serious part of FWF<br>membership, and cannot be successfully<br>managed on an ad-hoc basis. | Manuals, emails, etc.,<br>demonstrating who<br>the designated staff<br>person is. | 2     | 2   | -2  |

**Comment:** The Corporate Social Responsibility (CSR) & Quality, Health, Safety, Environment (QHSE) Manager is ultimately responsible to follow up on problems identified by the monitoring system. In practice, the production manager based in China is responsible for following up directly with the main suppliers on remediation.

| PERFORMANCE INDICATORS                                     | RESULT  | RELEVANCE OF INDICATOR   | DOCUMENTATION                        | SCORE | MAX | MIN |
|--|---|--|--------------------------------------|-------|-----|-----|
| 2.2 Quality of own auditing system meets<br>FWF standards. | Member<br>makes use of<br>FWF audits<br>and/or<br>external<br>audits only | In case FWF teams cannot be used, the<br>member companies' own auditing system<br>must ensure sufficient quality in order for<br>FWF to approve the auditing system. | Information on audit<br>methodology. | N/A   | 0   | -1  |

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION  | SCORE | MAX | MIN |
|--|--------|---|--|-------|-----|-----|
| 2.3 Audit Report and Corrective Action Plan<br>(CAP) findings are shared with factory and<br>worker representation where applicable.<br>Improvement timelines are established in a<br>timely manner. | Yes    | 2 part indicator: FWF audit reports were<br>shared and discussed with suppliers within<br>two months of audit receipt AND a reasonable<br>time frame was specified for resolving<br>findings. | Corrective Action<br>Plans, emails;<br>findings of followup<br>audits; brand<br>representative present<br>during audit exit<br>meeting, etc. | 2     | 2   | -1  |

**Comment:** ROOTS for Safety shares audit reports and CAPs with the factory and progress is monitored during factory visits by the production manager based in China, this information is shared and discussed with CSR manager via regular calls and email.

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION  | SCORE | MAX | MIN |
|---|--------|--|--|-------|-----|-----|
| 2.4 Degree of progress towards resolution of<br>existing Corrective Action Plans and<br>remediation of identified problems. | Basic  | FWF considers efforts to resolve CAPs to be<br>one of the most important things that<br>member companies can do towards<br>improving working conditions. | CAP-related<br>documentation<br>including status of<br>findings,<br>documentation of<br>remediation and<br>follow up actions<br>taken by member.<br>Reports of quality<br>assessments.<br>Evidence of<br>understanding<br>relevant issues. | 4     | 8   | -2  |

**Comment:** ROOTS for Safety received the audit report in January, therefore CAP has still yet to be properly followed up on. ROOTS for Safety actively shared the CAPs of each audit as a base to follow up on corrective actions. Timelines are established together with factory management. Production manager based in China visited the factory to discuss the most urgent findings of the CAP, including safety issues which were resolved, evidence of this was shown by documents provided by factory as well as photos of improvements within the factory.

**Recommendation**: To facilitate remediation, ROOTS for Safety could consider:

- Hire a local consultant to assist factory in developing an action plan and to assist factory management in investigating root causes.

- Organise supplier seminars.
- Provide factory training.
- Share knowledge/material.
- Providing financial support to the supplier for implementing improvements

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION  | SCORE | MAX | MIN |
|--|--------|---|--|-------|-----|-----|
| 2.5 Percentage of production volume from production locations that have been visited by the member company in the previous financial year. | 100%   | Formal audits should be augmented by<br>annual visits by member company staff or<br>local representatives. They reinforce to<br>production location managers that member<br>companies are serious about implementing<br>the Code of Labour Practices. | Member companies<br>should document all<br>production location<br>visits with at least<br>the date and name of<br>the visitor. | 4     | 4   | 0   |

Comment: ROOTS for Safety visited all their suppliers in 2018.

| Compliance with FWF guidance on risks<br>related to Turkish garment factories<br>employing Syrian refugees | Policies are<br>not relevant<br>to the<br>company's<br>supply chain                     |   |   | N/A   | 6   | -2  |
| Other risks specific to the member's supply chain are addressed by its monitoring system                   | Intermediate  |   |   | 3     | 6   | -2  |

**Comment:** ROOTS for Safety is aware of the risks specific to its production in Europe and continues to discuss any potential risk at suppliers during visits. These include the issues of low wages in Poland as well as

ROOTS for Safety acknowledges the risks of the risk for excessive overtime, freedom of association, issues around social insurances in China and mostly the government influence on factory decisions. However ROOTS for Safety, is strongly in favour for the working conditions in China and feels that is a relatively safe production location, having gained years of experience of it as their main sourcing location. ROOTS for Safety had an understanding of the general risks that come with working in China including workers wanting to work overtime because they can save some of the days to take during holiday. Whilst other workers live in poor conditions in factory dorms because they only come to these towns to work. ROOTS for Safety is adamant that this is not the case for their suppliers, and wants to make sure that workers go home after working hours. ROOTS for Safety has found difficulty discussing the compensation of overtime in the form of longer holidays because this is hard to verify. More discussions are being had with their supplier on the topic.

ROOTS for Safety has also has discussions with suppliers on social insurances, which ultimately resulted in more information in the difference between the rural and urban workers. Factory informed ROOTS for Safety that often times rural workers already have insurances covered by local government where as urban workers tend to opt for social insurances provided by their employer. ROOTS for Safety is yet to further look into this specific information.

**Recommendation:** ROOTS for Safety has made the first steps by identifying risks and starting to discuss them with suppliers, ROOTS for Safety can broaden this knowledge by participating in country specific trainings and/or webinars. Furthermore, ROOTS for Safety can encourage suppliers to also participate in webinars on high-risk issues in order to gain more guidance on how to mitigate risks and on additional measures to integrate in their monitoring systems.

| PERFORMANCE INDICATORS   | RESULT  | RELEVANCE OF INDICATOR   | DOCUMENTATION   | SCORE | MAX | MIN |
|--|---|--|---|-------|-----|-----|
| 2.8 Member company cooperates with other<br>FWF member companies in resolving<br>corrective actions at shared suppliers. | No CAPs<br>active, no<br>shared<br>production<br>locations or<br>refusal of<br>other<br>company to<br>cooperate | Cooperation between customers increases<br>leverage and chances of successful<br>outcomes. Cooperation also reduces the<br>chances of a factory having to conduct<br>multiple Corrective Action Plans about the<br>same issue with multiple customers. | Shared CAPs,<br>evidence of<br>cooperation with<br>other customers. | N/A   | 2   | -1  |

Comment: In 2018, ROOTS for Safety did not have shared production locations another FWF member company.

| PERFORMANCE INDICATORS  | RESULT  | RELEVANCE OF INDICATOR   | DOCUMENTATION   | SCORE | MAX | MIN |
|---|---------|--|---|-------|-----|-----|
| 2.9 Percentage of production volume where<br>monitoring requirements for low-risk countries<br>are fulfilled. | 50-100% | Low-risk countries are determined by the<br>presence and proper functioning of<br>institutions which can guarantee compliance<br>with national and international standards and<br>laws. FWF has defined minimum monitoring<br>requirements for production locations in low-<br>risk countries. | Documentation of<br>visits, notification of<br>suppliers of FWF<br>membership; posting<br>of worker information<br>sheets, completed<br>questionnaires. | 2     | 3   | 0   |

**Comment:** ROOTS for Safety fulfilled the monitoring requirements for its production volume in low-risk countries. The production location in low-risk country was visited; during visits suppliers were informed of FWF membership and completed CoLP questionnaires were returned before production orders were placed.

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION   | SCORE | MAX | MIN |

# 4. TRAINING AND CAPACITY BUILDING

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION  | SCORE | MAX | MIN |
|---|--------|---|--|-------|-----|-----|
| 4.1 All staff at member company are made aware of FWF membership. | Yes    | Preventing and remediating problems often<br>requires the involvement of many different<br>departments; making all staff aware of FWF<br>membership requirements helps to support<br>cross-departmental collaboration when<br>needed. | Emails, trainings,<br>presentation,<br>newsletters, etc. | 1     | 1   | 0   |

**Comment:** ROOTS for Safety shares information on their FWF membership with staff of their using internal newsletters. Information including when the brand performance check happens and its outcome are included in such updates. Furthermore, ROOTS for Safety distributes the FWF monthly newsletter with all the contact points including their sales staff to inform them of ongoing activities that may be interesting to further learn and share with customers.

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION   | SCORE | MAX | MIN |
|--|--------|--|---|-------|-----|-----|
| 4.2 All staff in direct contact with suppliers are informed of FWF requirements. | Уes    | Sourcing, purchasing and CSR staff at a<br>minimum should possess the knowledge<br>necessary to implement FWF requirements<br>and advocate for change within their<br>organisations. | FWF Seminars or<br>equivalent trainings<br>provided;<br>presentations,<br>curricula, etc. | 2     | 2   | -1  |

**Comment:** The CSR & QHSE Manager shares the FWF member updates with relevant staff at ROOTS for Safety, including Marketing, Purchasing and Sales teams. In 2018, the CSR & QHSE Manager and the Production Manager based in China arrange more regular discussions over FWF requirements. This was part of their quarterly discussions over compliance issues with their Chinese supplier.

| PERFORMANCE INDICATORS   | RESULT                                       | RELEVANCE OF INDICATOR   | DOCUMENTATION  | SCORE | MAX | MIN |
|--|--|--|--|-------|-----|-----|
| 4.3 All sourcing contractors/agents are informed about FWF's Code of Labour Practices. | Member does not<br>use<br>agents/contractors | Agents have the potential to either<br>support or disrupt CoLP implementation.<br>It is the responsibility of member<br>company to ensure agents actively<br>support the implementation of the CoLP. | Correspondence with<br>agents, trainings for<br>agents, FWF audit<br>findings. | N/A   | 2   | 0   |

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR   | DOCUMENTATION   | SCORE | MAX | MIN |
|---|--------|--|---|-------|-----|-----|
| 4.4 Factory participation in training<br>programmes that support transformative<br>processes related to human rights. | 0%     | Complex human rights issues such as<br>freedom of association or gender-based<br>violence require more in-depth trainings that<br>support factory-level transformative<br>processes. FWF has developed several<br>modules, however, other (member-led)<br>programmes may also count. | Training reports,<br>FWF's data on<br>factories enrolled in<br>training programmes.<br>For alternative<br>training activities:<br>curriculum, training<br>content, participation<br>and outcomes. | 0     | 6   | 0   |

**Comment:** In 2018, ROOTS for Safety suppliers did not participate in other training programmes that support transformative processes related to human rights.

**Recommendation:** FWF recommends members to implement training programmes that support factory-level transformation such as establishing functional internal grievance mechanisms, improving workermanagement dialogue and communication skills or addressing gender-based violence. Training assessed under this indicator should go beyond raising awareness and focus on behavioural change and long-term structures to improve working conditions. To this end members can make use of FWF's Workplace Education Programme communication or violence prevention module or implement advanced training through service providers or brand staff. FWF guidance on good quality training is available on the Member Hub.

| PERFORMANCE INDICATORS  | RESULT              | RELEVANCE OF INDICATOR   | DOCUMENTATION   | SCORE | MAX | MIN |
|---|---------------------|--|---|-------|-----|-----|
| 4.5 Degree to which member company follows up after a training programme. | Active<br>follow-up | After factory-level training programmes,<br>complementary activities such as remediation<br>and changes on brand level will achieve a<br>lasting impact. | Documentation of<br>discussions with<br>factory management<br>and worker<br>representatives,<br>minutes of regular<br>worker-management<br>dialogue meetings or<br>anti-harassment<br>committees. | 2     | 2   | 0   |

**Comment**: ROOTS for Safety had a follow up discussion with supplier after the training to discuss the training report. The suppliers were generally happy about the training, as were the workers who were much more positive about taking part in the training. ROOTS for Safety plans to have another training to allow more workers to take part in the Workplace Education Programme trainings.

#### TRAINING AND CAPACITY BUILDING

Possible Points: 11 Earned Points: 5

## 5. INFORMATION MANAGEMENT

| PERFORMANCE INDICATORS                                   | RESULT       | RELEVANCE OF INDICATOR  | DOCUMENTATION   | SCORE | MAX | MIN |
|--|--------------|---|---|-------|-----|-----|
| 5.1 Level of effort to identify all production locations | Intermediate | Any improvements to supply chains require<br>member companies to first know all of their<br>production locations. | Supplier information<br>provided by member<br>company. Financial<br>records of previous<br>financial year.<br>Documented efforts<br>by member company<br>to update supplier<br>information from its<br>monitoring activities. | 3     | 6   | -2  |

**Comment:** ROOTS for Safety demonstrated efforts to identify and register all active production locations in the database for the financial year including their correct FOB percentages.

ROOTS for Safety has an agreement with its suppliers that subcontracting is not permitted unless otherwise discussed. The technical nature of the product means that ROOTS for Safety has strict follow up policies to make sure the product does not leave the factory, and assure the quality is consistent. ROOTS for Safety assumes that any change in quality in the product is one indicator of potential subcontracting, which has not yet happened. However, ROOTS for Safety is largely dependant on production manager in China who does regular unannounced visits and uses the FWF audits to detect any subcontractors, which are then added to the supplier register.

| PERFORMANCE INDICATORS  | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION  | SCORE | MAX | MIN |
|---|--------|---|--|-------|-----|-----|
| 5.2 CSR and other relevant staff actively share information with each other about working conditions at production locations. | Уes    | CSR, purchasing and other staff who interact<br>with suppliers need to be able to share<br>information in order to establish a coherent<br>and effective strategy for improvements. | Internal information<br>system; status CAPs,<br>reports of meetings<br>of purchasing/CSR;<br>systematic way of<br>storing information. | 1     | 1   | -1  |

**Comment:** In 2018, the CSR & QHSE Manager and Production manager formalised their quarterly update meetings in which conditions and improvements at the main supplier in China where discussed. Updates on CAPs are also shared during these discussions. The CSR Manager shares relevant information on suppliers with the relevant teams at the headquarters during staff meetings or more generally via their internal newsletter.

# 7. EVALUATION

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION  | SCORE | MAX | MIN |
|--|--------|---|--|-------|-----|-----|
| 7.1 Systemic annual evaluation of FWF membership is conducted with involvement of top management | Yes    | An annual evaluation involving top<br>management ensures that FWF policies are<br>integrated into the structure of the company. | Meeting minutes,<br>verbal reporting,<br>Powerpoints, etc. | 2     | 2   | 0   |

**Comment:** The CSR & QHSE Manager discusses FWF membership with top management regularly. Top management requests updates on audit findings, remediation progress as well as WEP training outcomes during these meetings. Management continues to support FWF membership, as it assists ROOTS for Safety with addressing social compliance issues at its suppliers during visits.

| PERFORMANCE INDICATORS   | RESULT | RELEVANCE OF INDICATOR  | DOCUMENTATION   | SCORE | MAX | MIN |
|--|--------|---|---|-------|-----|-----|
| 7.2 Level of action/progress made on required<br>changes from previous Brand Performance<br>Check implemented by member company. | 40%    | In each Brand Performance Check report, FWF<br>may include requirements for changes to<br>management practices. Progress on achieving<br>these requirements is an important part of<br>FWF membership and its process approach. | Member company<br>should show<br>documentation<br>related to the specific<br>requirements made in<br>the previous Brand<br>Performance Check. | 2     | 4   | -2  |

**Comment:** In 2018, ROOTS for Safety resolved three out of the eight requirements given in the Brand Performance Check. ROOTS for Safety has rectified their communication policy to assure that their retailer and distributors correctly communicate FWF membership linked to ROOTS for Safety. Furthermore, ROOTS for Safety 's CSR & QHSE Manager streamlined communication with other employees in direct contact with suppliers. Specifically the production manager based in China. Trainings and progress of remediation of CAPS at suppliers are discussed as part of a company quarterly supplier update. FWF requirements and commitments are incorporated in the update meetings.

With the production manager based in China, more aware of FWF requirements ROOTS for Safety is more aware of how to identify the risks within the regions that they produce. Specifically for China where 90% of their production takes place, ROOTS for Safety is more diligent of the potential risks around them even though they are not yet risen at their supplier. ROOTS for Safety is working on creating a more systematic approach to integrating social compliance into their business processes and decision-making.

Lastly, ROOTS for Safety still needs to develop a demonstrable pricing policy where the member knows the labour cost of all products and which allows the payment of at least legal minimum wages in production countries. ROOTS for Safety is expected to take an active role in discussing living wages with its suppliers.
