This is where

ROOTS makes a difference

Trusted by millions of professionals worldwide. Our safety products are meticulously designed, manufactured and tested in accordance with the latest safety standards.

- ✓ Our offices and production in China.
- ✓ Independent quality control testings.
- ✓ QC-team available 24/7 in China.

Our devotion

We know that health, safety and wellbeing of your workforce is your number one priority. ROOTS cares deeply about the safety of anyone wearing its products, understanding the hazardous condition to which the products need to offer protection.

Imminent shortages of protective equipment

Given the imminent shortages of respiratory protection and test kits in Europe, we have commissioned our Quality Control team in Suzhou (China) to source significant amounts of the much-needed protective equipment. These include medical-, FFP2-, FFP3-masks and related products such as Corona Test Kits.

- ! Our QC specialists on the ground in Suzhou (China) are sourcing on a daily basis, finding the best production partners.

Our offices and production in China

We have offices in Rotterdam (HQ), Suzhou and Hong Kong. These offices were set up in 2010 with our own staff in order to perform quality controls that meet our established requirements. On a daily basis, six QC specialists are continuously involved in our quality controls.

Rotterdam, NL

Suzhou, CN

Hong Kong, HK

Our worldwide offices

Rotterdam (NL) - Headquarters, Sales, Marketing, R&D, Support
Suzhou (CN) - Quality Control, Sourcing, R&D
Hong Kong (HK) - Financial

Our certificates

We take responsibility in our organization and in our supply chain. In addition to being a member of the Fair Wear Foundation, we follow the quality management system ISO 9001 and our CSR Policy is certified in accordance with ISO 14001. This framework is part of maintaining our quality and continuously improving it so our organization fully meets the wishes and requirements of our customers. The entirety of measures and procedures in the field of quality assurance are recorded and documented in a manual.

Available masks and equipment

Boots on the ground in China

In regards to the impending shortage of respiratory protection and test kits in Europe, our QC specialists in Suzhou (China) and Hong Kong are in search for reliable production partners on a daily basis. They source for significant quantities of protective equipment; masks, test kits and related articles. We have successfully sourced these products.

Through this initiative, ROOTS wants to help tackle the shortages of protective equipment and to enable a large number of people to receive appropriate protection and thereby prevent the further spread of the COVID-19 virus.

! Important note

Given the worldwide influx of protective equipment. Is it necessary to act quickly. We can purchase these protective equipment from our Chinese partners. Please contact us as soon as possible.

The stock and production status changes daily.
